Split Complementary

Tuscan Roll Rim / HI-12
Pages 21 and 30

Using Color with Confidence

Color plays a critical role in how pottery is displayed—and how it sells. Thoughtful color combinations help create visual impact, guide the customer's eye, and make assortments feel intentional rather than crowded. The color wheel is a simple, proven tool for building combinations that feel balanced, dynamic, or calm—whether you're merchandising a retail space or planning a project.

Complementary

Colors opposite each other on the wheel create strong contrast and visual energy.

Best for: Feature displays, entry tables, and high-impact focal points that draw attention from a distance.

Split Complementary

A base color paired with two adjacent complements offers contrast with more flexibility and subtlety.

Best for: Versatile displays that need interest and contrast while still feeling refined.

Analogous

Colors that sit next to each other create a cohesive, layered look.

Best for: Large groupings, bench displays, and areas where you want a calm, collected feel that encourages browsing.

Triad

Three evenly spaced colors create a balanced but lively combination.

Best for: Mixed assortments that feel curated and energetic without overwhelming the space.

Merchandising with Color

Use color intentionally to guide the customer experience and increase sell-through:

- **Create visual anchors:** Use bold or high-contrast combinations to draw attention and define key areas
- **Group by color story:** Build sections around a palette for clarity and cohesion
- **Layer with plants:** Use foliage and blooms to reinforce the color story
- **Vary scale:** Mix sizes and shapes within a palette to add depth while staying organized
- **Refresh seasonally:** Rotate color stories to keep displays feeling new
